Biography

Over a nearly 30 year career in the film and television industry I have had the pleasure of working with some exceptionally talented cinematographers and directors on productions with all types of budgets and in every imaginable environment from frozen peaks in the Rocky Mountains to the desert in China. A passion for camera and a desire to be directly involved in the visual storytelling process led me to pursue a move to full time camera operating and steadicam in 2014. I offer a strong work ethic and positive attitude coupled with a keen understanding of camera movement and composition.
